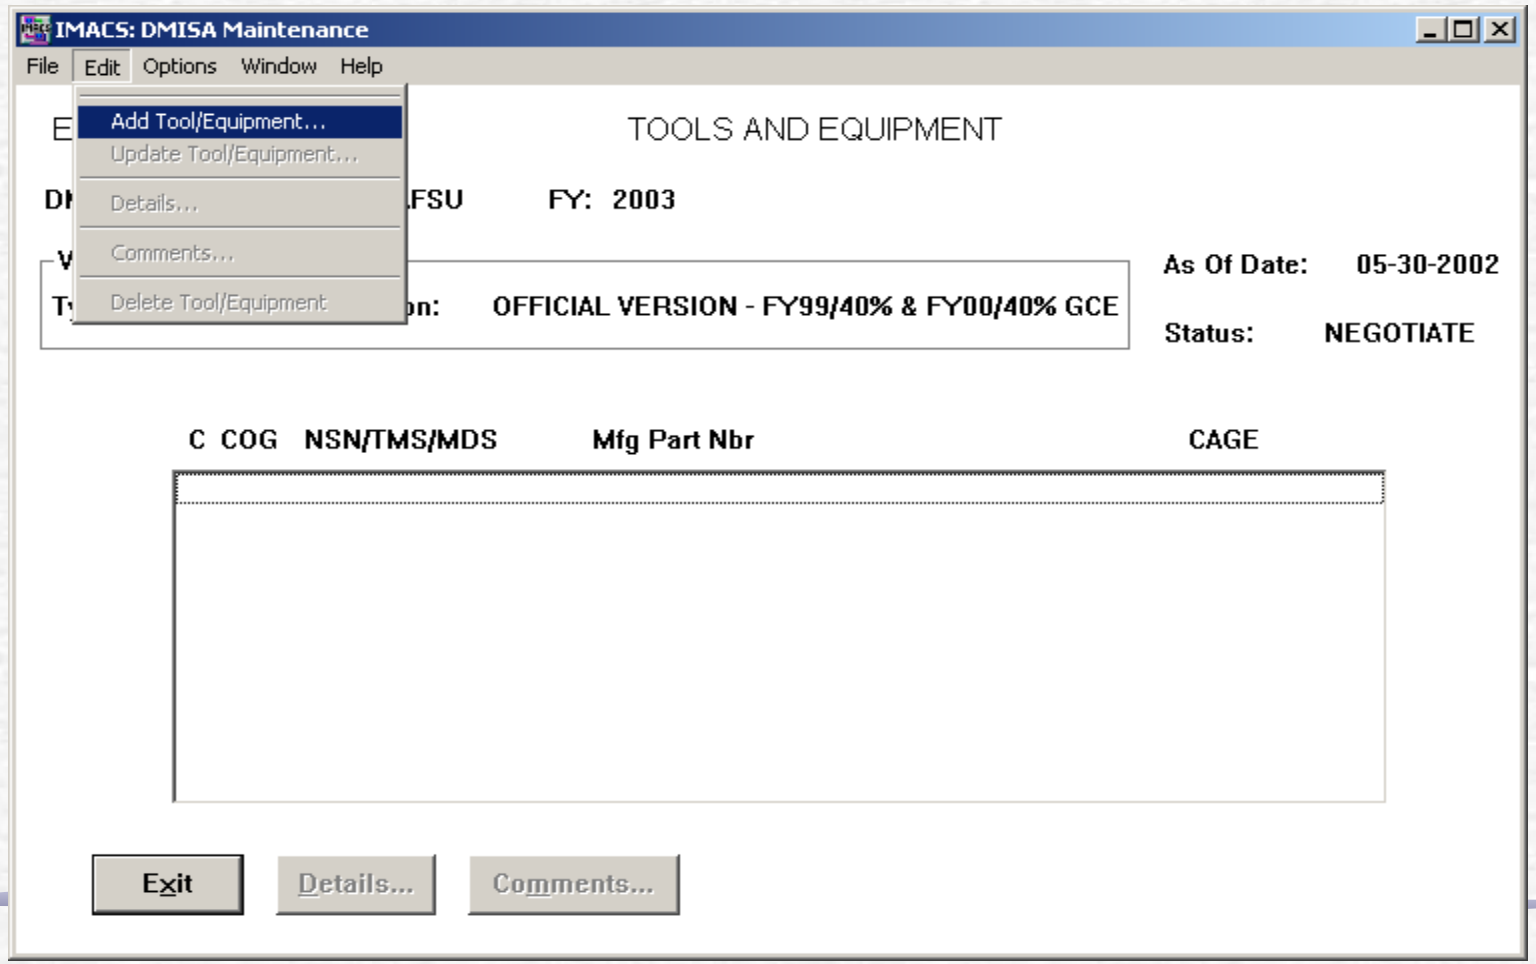
# OC-ALC Concerns…

- Frank Cosby commented on some of the Exhibit Tables not printing out as
  displayed on the IMACS screen
  - Might refer to inability of Cool:Gen and Oracle to ‘translate’ formatting characters from Word document/tables into Oracle.

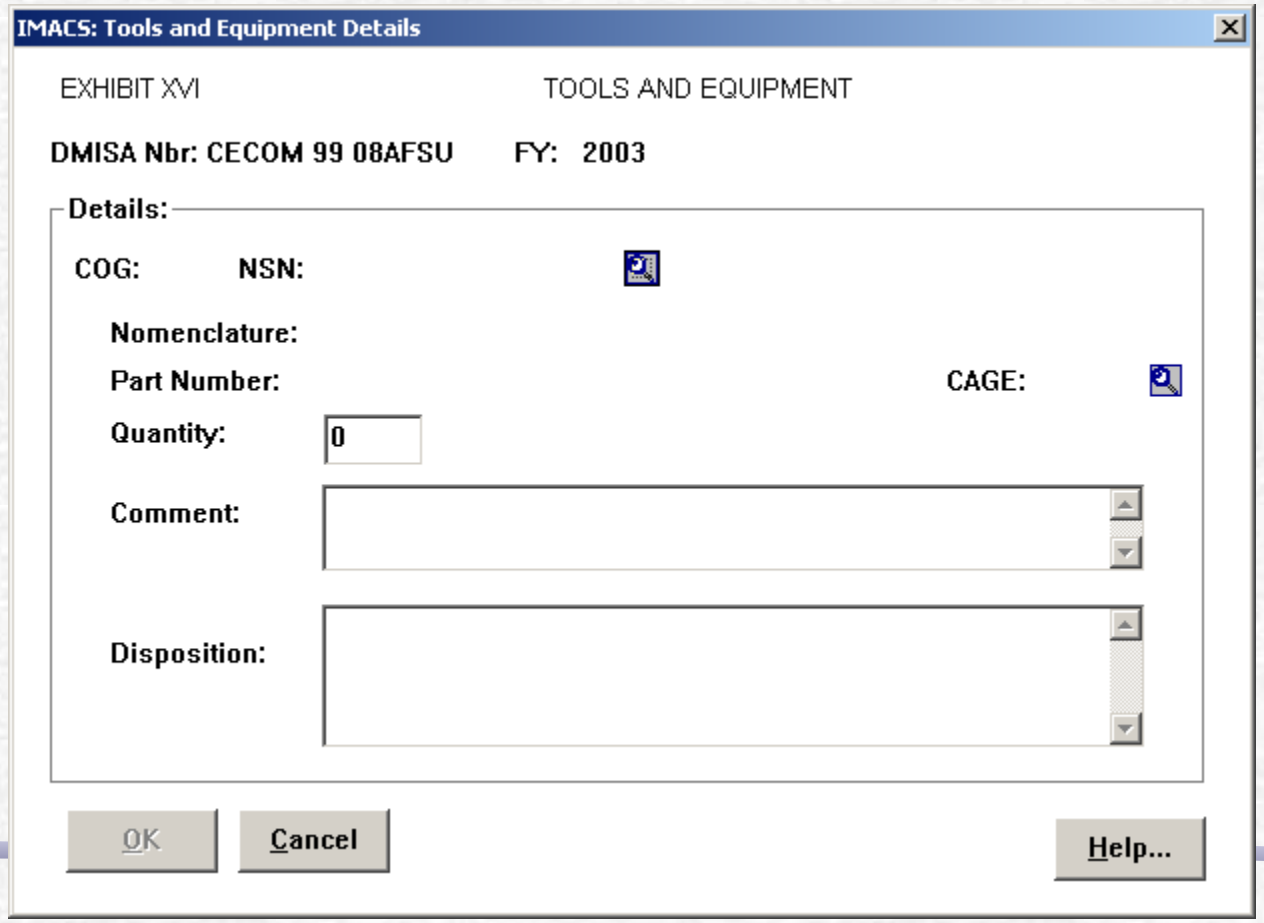
# OC-ALC Concerns…

- He asked for a better way to enter Ex 16 information and Temporary data
  - Not sure what is meant by ‘Temporary data’….Temporary NSN data?
  - Need clarification on this concern…

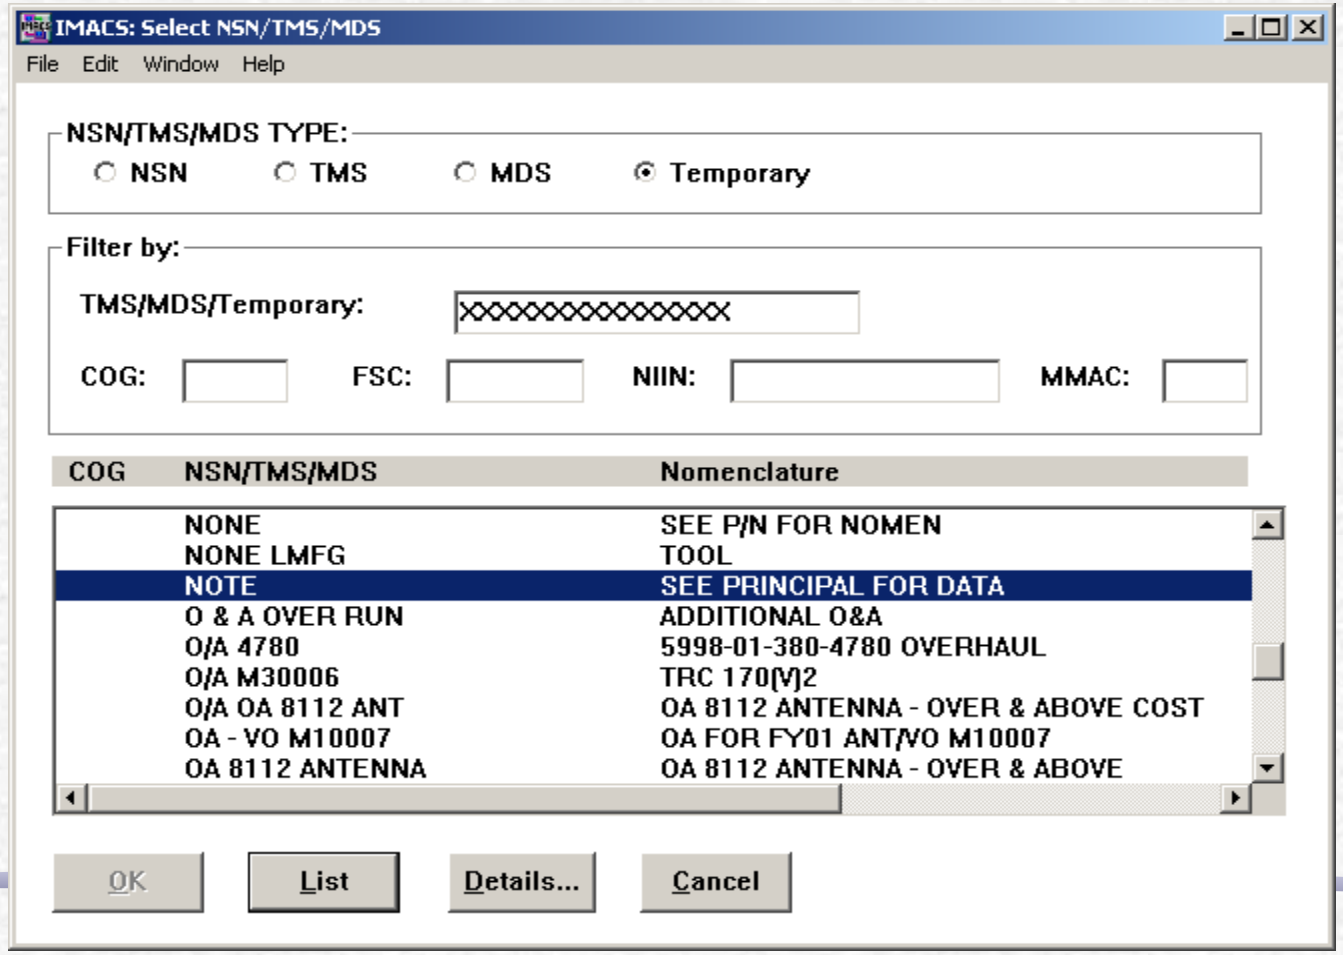
# Current Exhibit XVI – Tools and Equipment



# Current Exhibit XVI (Cont.)



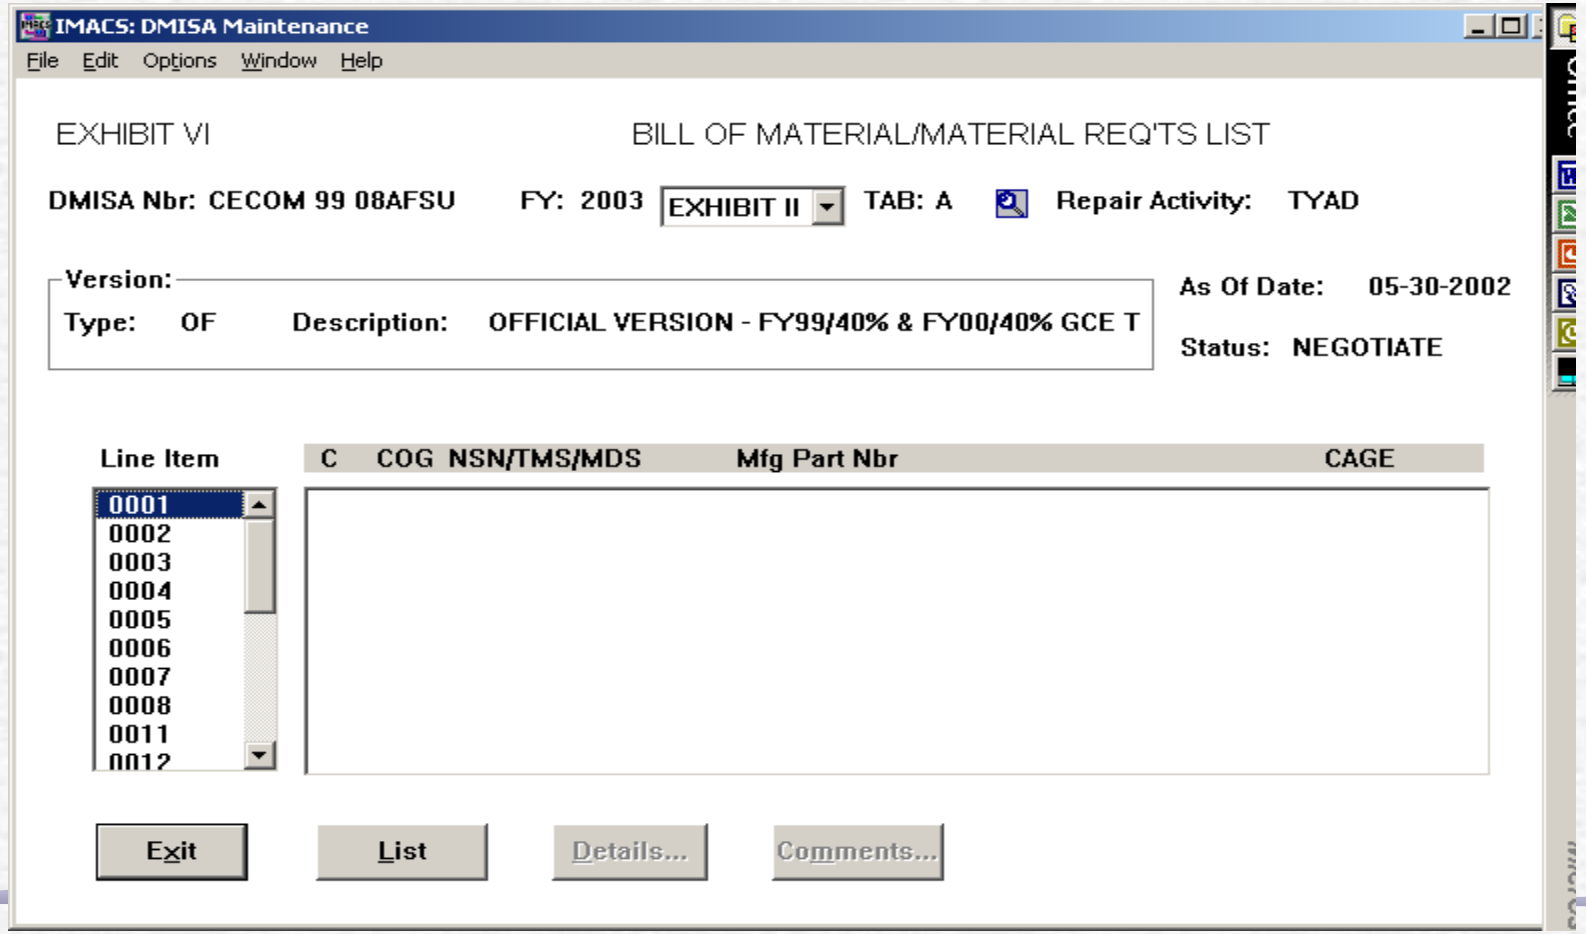
# Workaround…Select/Create Temp NSN with text that applies



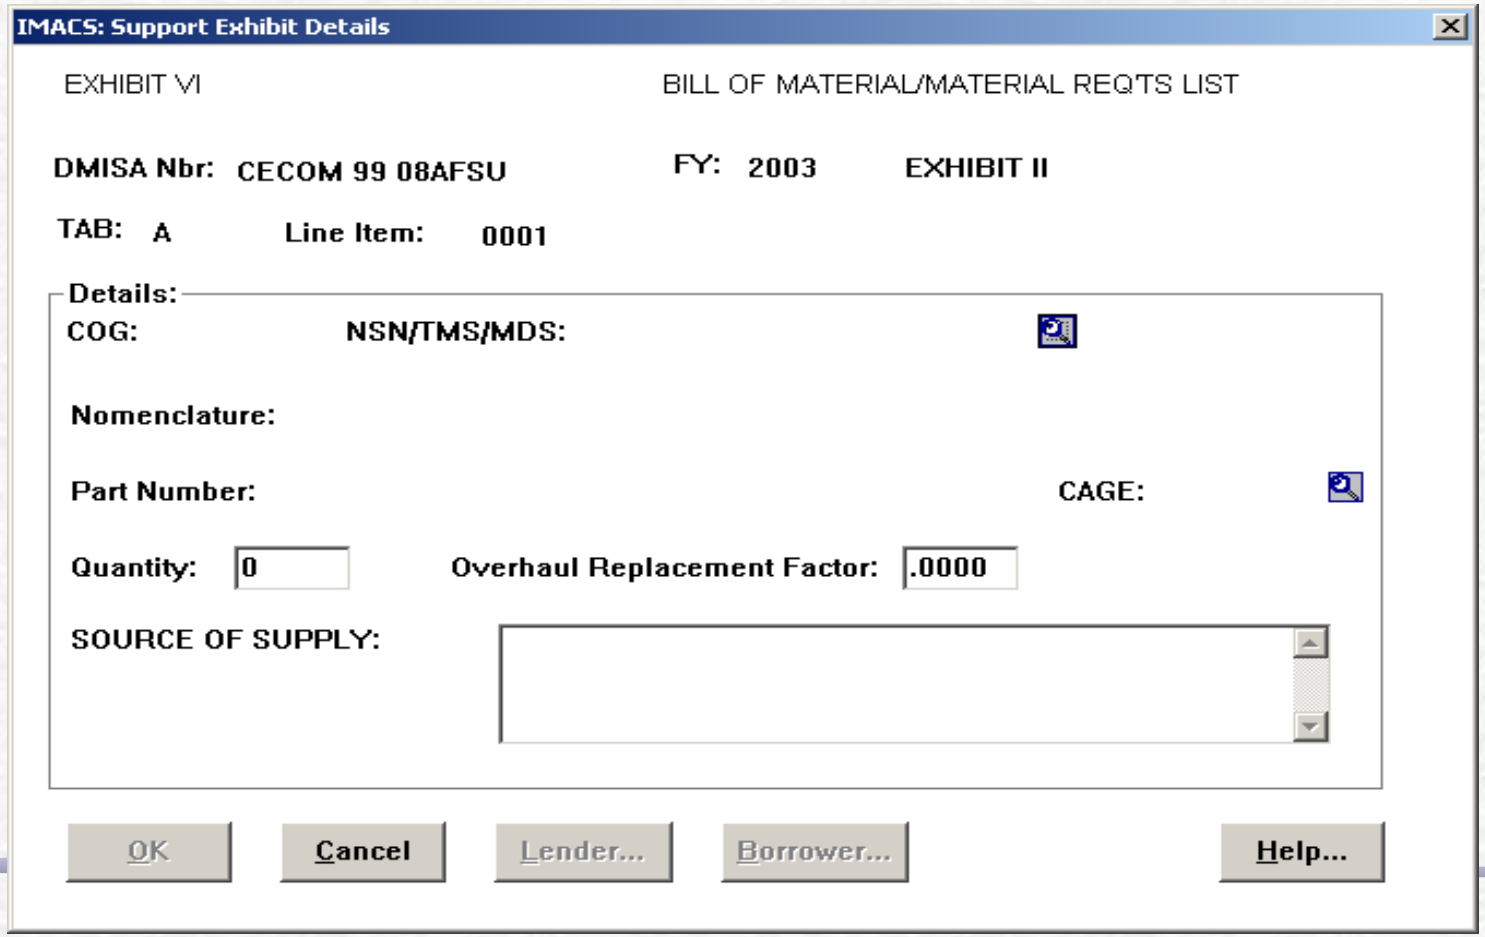
# Exhibit VI - Bill of Materials

- He asked if there is a more efficient way to enter the Bill of Materials (Ex VI) data.

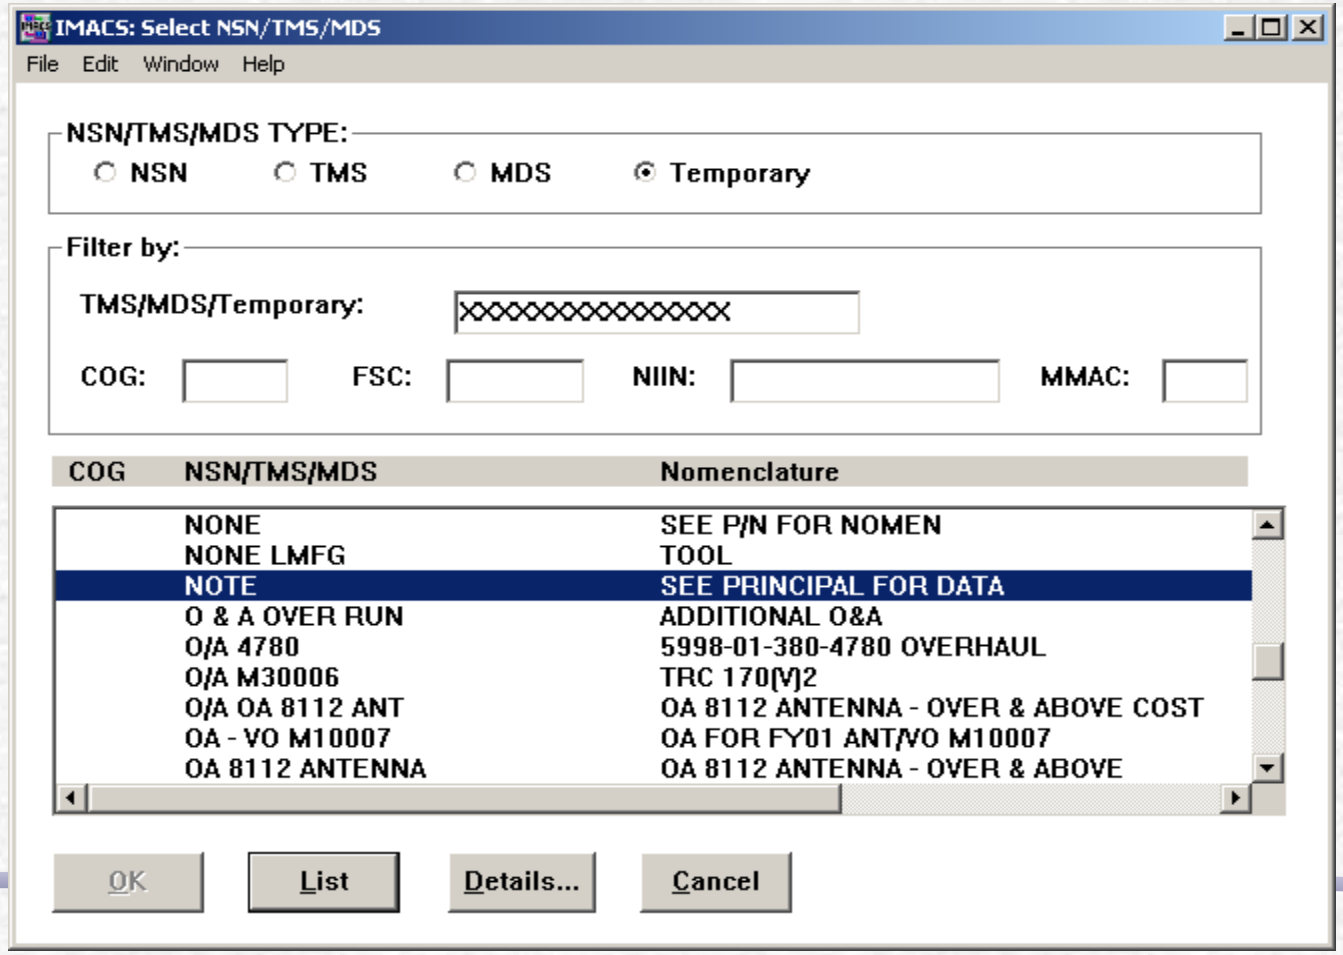
# Current Exhibit VI



# Current Exhibit VI



# Workaround…Select/Create Temp NSN with text that applies



# OC-ALC Concerns...

- Frank Cosby concerns...
  - Looking for a way to E-Mail and print the DMISA and Exhibits files
    - Partially satisfied with Oracle patch to be distributed with V5.2.
    - Many... but not all... reports will be able to be generated into PDF, RTF, or HTML formats from Print Previewer function

# Other things to consider...

- Response time on Exhibit X-B
  - Needs improvement
  - Might be able to be addressed when we do DRs 154424, 154414 dealing with X-B items
  - If need to access multiple TABs at same time, will need a new function to accommodate

# Other things to consider...

- Agent MISO cannot add Shipping instructions for Exhibit XIII-Part 2
  - Should they be able to do that?
    - Principal MISO can add both Part 1 and 2 instructions
    - Agent MISO can now add only add Part 1 instructions

# Other things to consider...

- Allow Shipping Clerk function be able to add Exhibit XIII shipping instructions, if needed
  - Not currently allowed
  - Should they be able to?

# What can we do….

- Use Workarounds, where possible.
- Plan to update, modernize IMACS with new, updated capabilities in future IMACS deployments
  - Web Enabling has ability to have links
